

Global Criteria – HIV and infant feeding*(continued from previous page)*

Out of the randomly selected clinical staff members:

- At least 80% can describe at least one measure that can be taken to maintain confidentiality and privacy of HIV positive pregnant women and mothers.
- At least 80% are able to mention at least two policies or procedures that help prevent transmission of HIV from an HIV positive mother to her infant during feeding within the first six months.
- At least 80% are able to describe two issues that should be discussed when counselling an HIV positive mother who is deciding how to feed her baby.

Out of the randomly selected pregnant women who are in their third trimester and have had at least two antenatal visits or are in the antenatal in-patient unit:

- At least 70% report that a staff member has talked with them or given a talk about HIV/AIDS and pregnancy.
- At least 70% report that the staff has told them that a woman who is HIV-positive can pass the HIV infection to her baby.
- At least 70% can describe at least one thing the staff told them about why testing and counselling for HIV is important for pregnant women.
- At least 70% can describe at least one thing the staff told them about what women who do not know their HIV status should consider when deciding how to feed their babies.
